

EMOH™ Highlights

Side-By-Side Photos

UNTREATED

Aequion partnered with a greenhouse vegetable producer for what amounted to a 43-day trial using an aeroponic system (vertical tower). To better diversify scope of findings, ten (10) crops were used including green onions, cilantro, bok choy, kale, arugala, cherokee lettuce, swiss chard, butterhead lettuce and strawberries.

Figure A

EMOH™-TREATED

No changes in nutrient nor watering program were made.

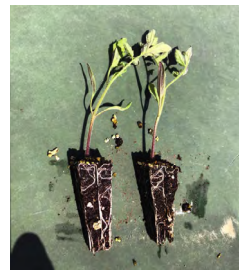

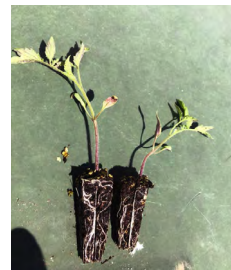

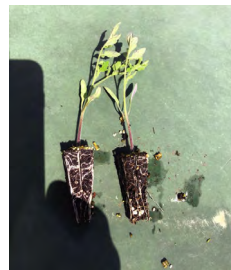

Figure A and Figure B illustrate the difference between untreated and EMOH-treated water.

Figure B

EMOH™-Treated (Left) v. Untreated (Right) in Each Picture

The four (4) images to the right illustrate the EMOH™ difference on root health.
